

Industry : Regulatory & Compliance

Location: United Kingdom

Services: Security by Design | Offensive & Defensive Security | Regulation & Compliance

Digital Transformation & Compliance

The Client:

Umbrella and self-regulatory body for Cyber Security professionals. The client raises awareness about cybersecurity careers, promotes a clear career framework, establishes professional standards, and supports the UK's National Cyber Strategy.

The Need:

The client needed a partner to digitalise manual cybersecurity professional assessment processes by developing a cloud-native web application. The platform needed to be ISO27001, GDPR, DPA, and WCAG compliant and highly secure.

How Did We Help?

- Support business requirements and help build a product roadmap and establish the technology and vision for the project
- Developed Assessment Platform, on **Azure**, utilising **Java Spring Boot, React** and **Postgres**.
- Followed extensive secure development life cycle practices, including **SAST, DAST**, and **vulnerability management**.
- Provided extensive training to the client's team and supported the external company managing their operations.

The Results

Multi-Year Project successfully kicked-off

Compliant with **ISO27001, GDPR, DPA** and **WCAG AA** standards

Transformation enabled **innovation, governance, efficiency, compliance** and **cost-saving**

53%

Cost Savings
