Vulnerabilities Assessment & Penetration Testing

The Client:

A European insurance provider, based in London, UK. They offer a range of insurance products, underwritten by local markets. Insurances products includes car, home, pet, travel and life insurance.

Our Approach

- Proactive and threat-led, informed by our threat intelligence teams, ensuring defence against the latest industry threats.
- Advanced, manual penetration testing gave the client a realistic view of potential exploitation points within their infrastructure, network, personnel and processes

What We Delivered

- Executive Summary report
- In-depth technical review
- Actionable insights, prioritised by potential impact
- Support to address necessary fixes within a suitable time frame
- An end-of-engagement debrief with the delivering consultant

The Results

- ✓ Enhanced security & control
- ✓ Rapid identification of vulnerabilities
- ✓ Elimination of blind spots
- ✓ Improved operational efficiencies

*"Our experience with **Simplified Solutions** has been excellent from start to finish. The clear and detailed scoping documentation made it easy to agree on scope and cost, allowing us to focus on the testing needed. The straightforward remote testing procedure reduced our workload by eliminating the need for an on-site tester. The tester was approachable and communicative, requiring minimal input from us. The post-test documentation was thorough and well-organised, with excellent detail and evidence, and follow-up questions on remediation were handled promptly and concisely."*
